

## GENERAL

The Mercian PVC strip curtains provide environmental protection for industrial and commercial property and are available to suit various types of openings.

PVC strip curtains are particularly suitable where vehicular access to your premises is by a main door which is, of necessity, open for long periods. They can be used internally to enhance the working environment by draught, dust and sound reduction. PVC strip curtains can be provided with welding curtain materials for protection against ultra violet flashes.

Maximum opening size: Unlimited width x 9000 mm high.

Special features of this range are:

- Simplicity of installation.
- Low maintenance.
- Individual strips easily replaced.
- Can protect against draughts and heat loss
- Internal environmental protection.

## COMPOSITION

*Curtain* Formed from radius edged extruded PVC strips. Standard size 300 mm wide x 3 mm thick. Other sizes used as required on design specification.

*Head Assembly* Heavy gauge stainless steel hanger or heavy duty angles and plates.

*Fixings* Standard designs for soffit or fascia fixings. Slide aside curtains available.

## SITWORK

**Construction** Openings may be formed in masonry, steel, concrete or timber. The building structure must be suitable to support the loading imposed by the door. Our technical staff will be happy to advise on specific requirements.

## SUPPLY

*Delivery* The doors are delivered to site on Mercian transport. Delivery periods are flexible to meet the demands of our customers but usual delivery times are 1/2 working weeks from settlement of details.

*Technical* For further information or technical advices please contact our Sales department.

## INSTALLATION & MAINTENANCE

The company has teams of specially trained installation engineers and offers a comprehensive programme of preventative maintenance, upgrade and emergency repair service to **ALL** types of industrial doors, Free survey and quotation service.
